

THE AVAYA IR INTERACTIVE VOICE RESPONSE SYSTEM WITH AMERICA'S HEALTHCARE SOLUTION SOFTWARE FROM ACCUVOICE INC.

Community outreach solutions using today's technology on behalf of our students, teachers and parents

New Generation Grade Reporting

The grade reporting application will allow parents and students to call into the Conversant and request specific grade information. The application will greet incoming callers and prompt them to enter the student ID number and their password. The Conversant will verify the ID number and password match and prompt the caller to choose either all classes or a specific class. The Conversant will read the student's current and most recent previous grade and date of the grade posting from the District's host computer.

- Application Administration**
- ❑ The School or the District will need to generate a flat ASCII file containing each student ID number, name, class codes and grades and the posting date.
 - ❑ The file should be replaced with a new file in order to pick up adds, changes and deletes of student ID's, class codes and grades.

- Benefits**
- ❑ Instant information
 - ❑ Ability to determine subjects that need worked on real time as opposed to waiting for the Report Card every six weeks
 - ❑ Potential revenue source with advertising on the grade reporting application
