

## Group Outcalling

The group out-calling program dials the phone number of a selected group of people and speaks a recorded message.

Suppose you were a major municipal utility that just experienced wide spread damage due to a severe weather situation. You need to rapidly notify your employees to report to work. You would access the Group Outcalling administration program using your touch-tone telephone to initiate a mass outcall notification message to selected Restoration Team members.

### Application Administration

- ❑ This application may or may not require connectivity to a host computer, based on how lists are to be loaded.
- ❑ Administered entirely over a touch-tone telephone
- ❑ Four different reports are available: Status of List, Call Summary by date, Call Results, Call history.

### Benefits

- ❑ A list message can be recorded in more than one language.
- ❑ Rapidly reach a large group of individuals with a consistent message.
- ❑ Lists can be made on the fly for emergency outcall situations.
